

JOIN OUR TEAM

Lead Tunnel Inspector

Los Angeles Area

BabEng is a global engineering company with a worldwide reputation for underground works. We focus on tunnel projects utilizing various tunnel boring machines (TBM). We have successfully worked on tunnel projects on all continents of the world.

Our Construction Management Team in the US is growing.

We are looking for a **Lead Tunnel Inspector** for a project in the Los Angeles area.

THE JOB

As part of the owner's construction management team it will be your responsibility to provide tunnel inspection services during the construction of a TBM bored tunnel. General responsibilities include:

- Inspection of tunnel construction work, pressurized face TBM, the final lining, etc.
- Lead a team of tunnel inspectors
- Provide general inspection of all contractor and subcontractor work
- Assure compliance with approved submittals

YOUR PROFILE

You have a technical background and at least ten (10) years of tunnel construction related experience, preferable in inspection or construction services. Experience with pressurized face balance tunnel boring machines is required. In addition to good communication skills the position further requires:

- Existing work permission for the US (if not an US citizen)
- Understanding of and experience with Tunnel Boring Machine (TBM) technology
- Experience in documenting contractors day-to-day work activities and progress/performance
- Ability to work independently in a team environment
- Ability to perform physical activities to safely access and inspect the construction site

WHAT YOU WILL FIND

BabEng offers an exciting and challenging job with a competitive compensation and a benefits package which includes 401(k) plan, medical, dental and vision insurance.
